

Technical Data Sheet

Part # 1003	Name: 5.9L Fuel Rail Plug for Cummins '03 to '07
-------------	--

Product Description:

The APP 5.9L Fuel Rail Plug replaces the stock pressure relief valve. This valve helps maintain fuel rail pressure during heavy engine load conditions. It eliminates potential low fuel rail pressure DTC codes P0148 & P0192 & P0087. Made in the USA from 304 stainless steel.

Fits all 5.9L Cummins '03-'07

Replaces:

Cummins part# 3947799
Bosch Part #1-110-010-029

Install Instructions:

On the 5.9L Cummins 2003-07 the stock pressure relief valve is located on the fuel rail directly behind the fuel rail pressure sensor.

To install the APP 5.9L Fuel Rail Plug: Remove the factory return line from the stock relief valve; Remove the relief valve; Install the APP fuel rail plug, torque to 90ftlb, and reinstall the factory return line.

A word of caution before attempting any performance modification: It is the sole responsibility of the purchaser and installer of any APP part to employ the correct installation techniques required to ensure the proper operation of the part. APP offers the highest quality performance parts; however, APP holds no liability for any part failure due to improper installation or use. Some APP parts can be used for off-road and competition. It is the sole responsibility of the customer to verify that the use of their vehicle and items purchased comply with federal, state and local regulations. APP offers no certification regarding pollution-controlled devices or mandated emissions requirements. Performance products are legal in California only in certain strict circumstances. There is no instance where APP, it's officers, members, employees, agents, representatives, and/or volunteers are liable for any damages, personal or mechanical, whatsoever.
