

Technical Data Sheet

| | |
|-------------|--|
| Part # 4001 | Name: 6.7L Fuel Rail Plug for Cummins '07.5 to Current |
|-------------|--|

Product Description:

APP's 6.7L Fuel Rail Plug replaces the stock pressure relief valves. This valve helps maintain fuel rail pressure during heavy engine load conditions. It eliminates potential low fuel rail pressure DTC codes P1093 or P0087 that are caused +by insufficient pressure relief valve spring pressure. Made in the USA from 304 stainless steel.

Fits 2007.5 to Current Cummins 6.7L Diesel Engines

Replaces:

Mopar part# 68005441aa
Bosch part # 1-110-010-013

Install Instructions:

On the 6.7L 2007.5 to Current Cummins, the stock pressure relief valve is located on the back of the driver side fuel rail.

Note: Reuse original o-ring from stock plug.

To install the APP 6.7L Fuel Rail Plug: Remove the glow plug computer; Remove the factory relief valve; Install the APP fuel rail plug. Torque to 90ftlb.

A word of caution before attempting any performance modification: It is the sole responsibility of the purchaser and installer of any APP part to employ the correct installation techniques required to ensure the proper operation of the part. APP offers the highest quality performance parts; however, APP holds no liability for any part failure due to improper installation or use. Some APP parts can be used for off-road and competition. It is the sole responsibility of the customer to verify that the use of their vehicle and items purchased comply with federal, state and local regulations. APP offers no certification regarding pollution-controlled devices or mandated emissions requirements. Performance products are legal in California only in certain strict circumstances. There is no instance where APP, it's officers, members, employees, agents, representatives, and/or volunteers are liable for any damages, personal or mechanical, whatsoever.
