DOG WILL HUNT

AIRDOG MOUNT AND SKID PLATE FROM LONGHORN FAB SHOP

Obviously, one of the most critical performance aspects of your truck is its fuel system. So don't just let your AirDog hang down from the frame and expose it to road and field hazards. Longhorn Fab Shop has created a completely new mounting system for your AirDog pump system. It's a completely bolt-on design with an integrated skid plate that provides extreme protection for your AirDog and filters. It's great for driving on and off mobile homes, trailers, entering and exiting fields, and for hunting and off-road trails.

FLOW-THRU FUELING

BILLET DELIVERY VALVE HOLDERS FROM ATTITUDE PERFORMANCE PRODUCTS

Designed for all Bosch P7100 injection pumps like those used in 1994-1998 Dodge Cummins engines, these Billet Delivery Valve Holders are engineered to allow more fuel flow to the injectors. This is due in large part to the removal of the internal spring found in the factory holders, thus allowing for a true flow-thru design. These stainless steel BDVHs also help reduce pump wear and tear and contribute to your engine's custom look.
