EASY CUMMINS POWER

ATTITUDE PERFORMANCE BILLET RACK CAP

APP's Billet Rack Cap (also sometimes called the "rack plug") allows for full rack travel of the Bosch P7100 injection pump. The Attitude Rack Cap is drilled to 12mm, which is 4mm deeper than a stock rack cap. This allows additional travel, which in turn provides more fuel flow, which in turn equates to more horsepower. The APP billet cap is designed to fit on all Bosch P7100 pumps.
