WAGLER'S ALL BILLET COMPETITION DURAMAX DX500

Wagler Competition Products' (WCP) DX500 is the first-ever all billet Duramax engine. It was designed and machined in-house by Wagler Competition Products specifically to meet the extreme power demands of top level diesel competition. The 500 cubic inch DX500 utilizes the best components and technology available in the racing industry. Check back next month where we'll have a full in depth look at Wagler's DX500 right here in Diesel World.

PISTON COOLERS

ATTITUDE PERFORMANCE PRODUCTS PISTON OIL SQUIRTERS

Keeping your pistons cool and well lubricated is essential to engine performance and longevity. Yet the oil squirters in 1988-2003 Cummins are made of plastic and prone to failure. Attitude Performance Products solves the problem with their new 7075 billet aluminum piston oil squirters. Not only are they much stronger than the factory parts, they are designed to increase oil velocity as well.
